

What Is Claimed Is:

1. An ink for fabric printing, comprising a pigment
and a resin emulsion,

5 wherein the weight ratio between the pigment and the
resin emulsion by solid basis is between 1:0.7 and 1:3.0.

2. The ink for fabric printing according to Claim 1,
wherein the weight ratio between the pigment and the resin
10 emulsion by solid basis is between 1:1.0 and 1:3.0.

3. The ink for fabric printing according to Claim 1
or 2, wherein the particles of the resin emulsion are
produced in the liquid.

15

4. The ink for fabric printing according to Claim 1,
wherein the particles of the resin emulsion are spherical.

5. A printing method, comprising:
20 a printing step, in which printing is performed by
causing the ink for fabric printing according to Claim 1 to
adhere to a fabric; and

a fixing step, in which the ink for fabric printing
applied to the fabric in the printing step is fixed to the
25 fabric by heating.
